EXPERIENCE

Rareprob - SDE

03/2024 - present

- Spearheaded all web projects and creating, maintaining, and improving multiple company websites.
- Developed cross-platform web views for Android and iOS, ensuring consistent mobile experience.
- Led website localization for multiple languages, enhancing global reach and improving accessibility worldwide.
- Constructed a Node.js socket backend for multiplayer games, boosting real-time user interactions.
- Architected a blog portal with MERN and automated workflows, enhancing content management efficiency.
- Orchestrated deployment pipeline on Ubuntu VPS using Nginx Server configuration and maintenance.
- Executed complete redesign and rebuilding of the company's games website that led to exponential user growth from 302K to 1.7M active users.
- Established best coding practices like Single Responsibility Principle and using Typescript with JavaScript.

75ways Technologies – SDE Intern

12/2023 - 03/2024

- Worked on complex client projects using TypeScript, React, and Node.js tech stack.
- Implemented Role-Based Authentication system and react-i18n for comprehensive multi-language support.
- Crafted intuitive multi-step stepper forms improving user experience and navigation flow.
- Integrated complex API systems with Redux Thunk ensuring seamless data flow and user interaction

EventDesu – Frontend Intern

05/2022 - 08/2022

- Engineered commercial website frontend using React JS, focusing on performance optimization.
- Optimized page load time through efficient React components implementation.
- Architected React Router integration for seamless single-page navigation.

PROJECTS

[Blog Website Link](#)

- Created full-stack blog platform using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Integrated JWT and Google Authentication for secure user access management.
- Designed RESTful API architecture for robust backend functionality.
- Designed responsive UI using React.js and Tailwind CSS for optimal user experience.

[Job Recommendation System Link](#)

- Engineered a full-stack job portal using Node.js, Express, and TypeScript with comprehensive user and employer Roles where user can select their job interest and employer can post jobs.
- Developed automated email notification system using Nodemailer for job matching.
- Integrated secure data storage and retrieval system for user profiles and job listings

[Google Docs Clone App](#) [frontend-link](#) [api-link](#)

- Engineered collaborative text editor with real-time formatting capabilities.
- Implemented Socket.io for multi-user real-time document editing and sharing.
- Created comprehensive text formatting options including font styling and heading management.
- Developed full-stack solution ensuring seamless updates across multiple concurrent users.

FND HR system

- Implemented a multi-role system with separate interfaces for company administrators, DCW and users.
- Constructed company dashboard for managing DCW, user assignments, and timesheet approvals.
- Built DCW interface for service delivery tracking, timesheet generation, and user interaction management.
- Constructed user-DCW linking system allowing companies to assign and manage service relationships.

EDUCATION

- DIT University - Dehradun
Bachelor of Engineering, Computer Science; CGPA: 7.8

08/2020 - 08/2024

ACHIEVEMENTS

- Earned Employee of the Month recognition.
- Delivered UKPCB website project on contractual basis.
- **Solved 130+ problems** based on Data Structures and Algorithms in Java on [LeetCode Link](#).
- Successfully **contributed to Open Source** during **Hacktoberfest '23**, with all four PR requests merged.

SKILLS

- **Languages:** Java, SQL, JavaScript, Typescript, HTML, CSS, MongoDB, postgresql.
- **Web Development:** React.js, Redux-toolkit, Node.js, socket.io, Express.js, MUI, Bootstrap, Tailwind CSS, Scss.
- **Dev Tools:** Git, Linux, Jira, Postman, Docker, Nginx, Figma, Webpack, Vite.
