-
till
date

Rareprob Solutions Private Limited

Dehradun , India

- Developed and maintained 2D shooter and 2D platformer games with engaging and polished gameplay loops.
- Implemented 2D physics-based mechanics such as knockback, jumping, collisions, and puzzle interactions using Unity's Physics2D system.
- Designed and animated dynamic UI elements using Unity Animator and DOTween for menus, transitions, and in-game effects.
- Built and optimized games for WebGL and Android, ensuring high performance on both low- and mid-end devices.
- Integrated AdMob and Unity Ads for monetization, and used Firebase for analytics, crash reporting, and remote configuration.
- Focused heavily on code and asset optimization to reduce load times, memory usage, and file size.
- Collaborated with designers and artists to develop feature-complete, scalable games from concept to release.

Some Key Projects

- **Christmas Battle (2d Shooter) - WebGL => [Link](#)**
- **The Lost Color (2d Platformer) - WebGL => [Link](#)**
- **Egg Drop - Native => [Link](#)**
- **Mystic Find (Find Object) - Native => [Link](#)**
- **Zig Zag Zone (Merge of 3 Games) - Native => [Link](#)**
